

Abstract

Described is a preparation, in particular a cosmetic preparation, in the form of a workable paste which is present in the form of an emulsion and which is suitable for cosmetic uses, in particular in the area of decorative cosmetics for colouring and improving the skin, the lips and the eyelids. It is also suitable as a fixing for lipstick, as lip care, as a skin care foundation or as a sun protection agent. It contains an ester component, a suitable emulsifier, a volatile silicone oil, optionally a moistening agent, a solids phase and water. In addition it may also contain the additives and adjuvant substances which are approved and usual in cosmetics. Processes for the production of that preparation are also described.
